Program

ATTENTION ALL EMPLOYEES!! Are you struggling with how a program software is designed? Do you have a new or creative way to better serve our producers? Or even an idea of how to improve on a program and want your thoughts and opinions heard? Then submit your suggestions and comments using the Program Efficiency Submission Form on the NASCOE.org website underneath the programs tab. Your comments go directly to a state, area or national programs chairperson for consultation with the national office. We all have had thoughts on how to improve software or an idea to better meet the FSA mission of "*equitably serving all farmers, ranchers and agricultural partners through the delivery of effective, efficient agricultural programs for all Americans"* and now is your chance to make a difference!

Our goal for WI is to get at least 5 submissions for 2019. As the new farm bill rolls out please take a moment to give your feedback. Forms can be filled out during office hours and responses to comments/suggestions will be posted on the NASCOE website.
